Haas Natal

La empresa Haas inició su actividad en el mercado de fabricación de productos de fibra de vidrio en 1994, después de la implantación de una unidad de producción en la ciudad de Macaíba / RN, noreste de Brasil. El Estado de Rio Grande do Norte fue el lugar escogido para establecer la sede de Haas, teniendo como motivos principales su ubicación estratégica y, por supuesto, su clima privilegiado, factor muy importante para la estabilidad en la aplicación de las materias primas utilizadas, proporcionando así, una mejor garantía en la calidad de sus productos.

La centralización de la planta de fabricación de Haas tuvo como objetivo mejorar la calidad del producto final, a través de un riguroso control de las materias primas, obtenemos una trazabilidad completa de todos los insumos utilizados en la producción de nuestros productos. Otra razón importante para centralizar la producción es la estandarización de sus productos, ya que al tener un único control de calidad, este se vuelve cada vez más preciso y estricto.

Desde los inicios al día de hoy, Haas se ha expandido conquistando nuevos espacios y consolidándose entre las mayores y mas modernas industrias de productos fibra de vidrio de país.

Estamos presentes en varias regiones, con sucursales y puntos de representación. A lo largo de los años, hemos invertido mucho en tecnología y recursos humanos, con el enfoque siempre dirigido hacia la satisfacción plena del cliente.

Haas Piscinas es mucho más que un simple fabricante de piscinas y productos de fibras. Somos constructores de sueños. Construimos con placer el ocio de miles de personas que en todo Brasil, consumen nuestros productos y atestam la alta norma de calidad como nuestro principal diferenciador. Haas es sinónimo de credibilidad y confianza.

HAAS - Swimming Pools Company started its activities in the business of making fiberglass products in 1994, from the establishment of the unit located in the city of Macaíba Rio Grande do Norte State - northeast of Brazil. Rio Grande do Norte was chosen because of its privileged and strategic location and, of course, the weather which is extremely important for stability in the application of the raw material used in products manufacturing.

The centralization of HAAS manufacturing units had the main objective as reach a better quality for the final products, because they are manufactured with high level of quality control in the raw material applied. This way it gives total traceability of all materials used in the process of our products, creating an identity for them. Other important reason of the production centralization and the products of uniformization its because with this unique control it becomes more precise and rigorous. From that time up to now HAAS has expanded, conquering new market spaces and today it is consolidated between the biggest and most modern fiber glass industries in the country.

The Company is present in several Brazilian regions, with branch and representatives. Along the years, it has been invested strongly in technology and human resources, always pursuing the client satisfaction.

Haas swimming pools is much more than a simple manufacturer of swimming pools and fiberglass products. We are dream makers. We built with pleasure the leisure of thousands of people around Brazil that use our products and they certify the quality as our main differential. HAAS is a synonym of credibility and trust.

Haas Manaus

Em julho de 2013, implantou a segunda unidade fabril na Zona Franca de Manaus, em uma área de 300.000 m², sendo considerada hoje uma das maiores e mais moderna indústria de piscinas de fibra de vidro da América Latina, expandindo o atendimento no mercado brasileiro, atuando também na exportação de seus produtos. Desta forma, a HAAS Piscinas consolida-se definitivamente como uma empresa de alto padrão de qualidade, sempre pensando na satisfação do cliente, razão maior de sua existência.

Haas®

A Haas é única detentora da patente do método construtivo, além de fabricante das piscinas modulares em fibra de vidro PRFV.

Hybrida 2.0

Inovação e tecnologia a favor de seu lazer. A piscina *Hybrida 2.0* combina resistência, versatilidade e velocidade. Base em concreto armado, estrutura modular em painéis PRFV e revestimento em vinil. Deve ser montada sobre radier armado respeitando as condições do terreno. Rápida instalação, com sua piscina pronta em poucos dias.

Monte sua piscina em 3D

Piscinas Hybrida 2.0

É um novo conceito de piscina modular que combina a leveza e velocidade de instalação de uma piscina de fibra, com a versatilidade, o charme e a beleza de uma piscina de vinil. Utilizando os vários painéis padronizados em PRFV, com a **Hybrida 2.0**, é possível configurar os mais diversos formatos e tamanhos de piscinas, para fins comerciais ou residencial, e finalizá-la com uma das inúmeras opções de revestimentos (estampas, espessuras, efeitos de textura, etc.).

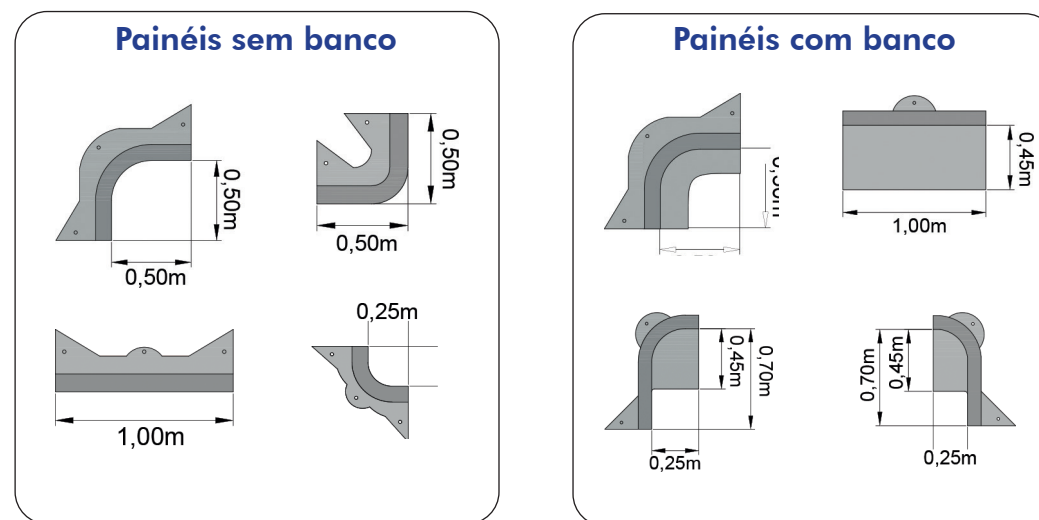

Com isso sua piscina poderá se tornar única e exclusiva, podendo ainda se adicionar itens como: iluminação, aquecimento, hidromassagem, cascatas, robôs, etc., que agregarão ainda mais valor à sua piscina.

Vantagens da HYBRIDA 2.0

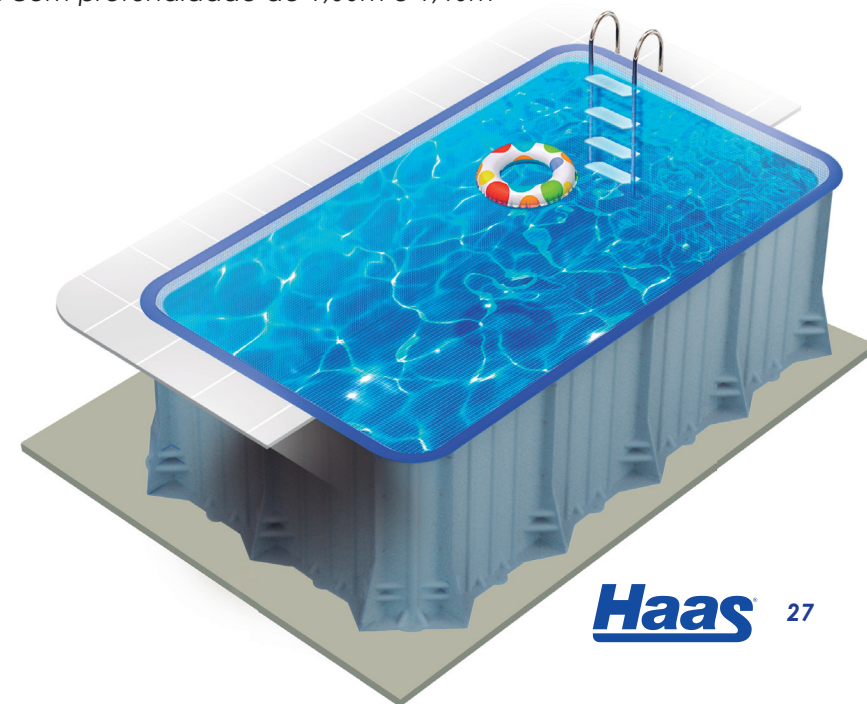

- Transporte de baixo custo;
- Armazenagem em pouco espaço;
- Não há a necessidade de se estocar vários modelos de piscinas prontas (somente os painéis);
- Montagem extremamente rápida e fácil;
- Possibilidade em vários tamanhos e formatos;
- Possibilidade de vários acabamentos;
- É montada no local;
- Menos tempo e montagem (principalmente se comparada com as atuais piscinas de vinil);
- Produto com patente requerida.
